100% of all ingredients are produced by Organic Farming

Manufacturing process controlled. Characteristics certified by Bureau Veritas Certification -92046 PARIS LA DÉFENSE- according to standard I-305 available on www.qualite-france.com

Composition

INGREDIENTS: Camphene, Camphor, 1,8-cineole, Alpha-pinene, Borneol.

Smell: Refreshing and sparkling odour.

Use

DIRECTIONS:

- Main uses of Essential Oils: medical treatment (oral, transcutaneous, cutaneous, pulmonary application), therapeutic massage, cosmetic skin and hair care, balneotherapy, perfumes and cosmetics and gastronomy.
- Essential Oils are highly concentrated vegetable extracts. For all methods of adsorption and in particular oral application, use the appropriate excipients.
- Essential Oils are not water-soluble: do not use water as an excipient, use vegetable oils, a cleansing base (shampoo, shower gel), alcohol or a neutral cream base.
- For oral application: dilute Essential Oil in a vegetable oil, honey or sugar (sugar cane syrup).

WARNINGS:

- Keep out of the reach of children.
 - Never pour pure Essential Oils into water, if used in this way they may cause skin irritation.
 - Not suitable for children under the age of 3.
 - Some Essential Oils may be dangerous for pregnant and breast-feeding women. Avoid self-medication. Seek advice from your aromatherapy doctor.
 - Special attention should always be given to patients with a known allergy; a certain number of potentially allergenic molecules may be present in Essential Oils (cinnamaldehyde, citral, citronella oil, eugenol, geraniol, d-limonene, linalol, coumarin etc.).
 - Some Essential Oils irritate the skin and mucous membranes; bear in mind the aggressiveness of phenols and aldehydes to the skin and mucous membranes. Select suitable excipients and appropriate concentrations.
 - A skin test is recommended prior to use for checking tolerance of Essential Oils (apply to inside of the wrist).
 - If oils are splashed into the eyes, wipe the affected eye immediately with a cotton wool pad soaked in pure vegetable oil or place a few drops of pure vegetable oil into the eye.
 - Never apply pure Essential Oils to the anogenital region, aural or nasal passages or administer intravenously.
 - In the event of accidental swallowing ingest vegetable oil (1 to 3 tablespoons), do not induce vomiting. Never drink water.
 - All citrus essential oils are photosensitive. Do not expose yourself to the sun within 12 hours of application or ingestion.
 - Peppermint essential oil should never be applied over an extensive cutaneous area (freezing reaction).
 - Medical supervision is essential for all pathologies with a lengthy duration and for the elderly since it is advisable to check the absence of an interaction between Essential Oils and on-going treatments.
- In the event of the accidental ingestion of a large quantity of Essential Oil contact your nearest anti-poisons centre.

STORAGE INSTRUCTIONS:

Keep out of light and away from heat.
