PRINCIPAL INDICATIONS:
Cardiovascular, Digestion, Energy (fatigue), Sport performances (muscle aches), Weight (slimness)

The importance of thyroid hormone balance is often overlooked, but the thyroid gland is essential to a healthy body. It has an impact on optimum muscle mass to body fat ratio.

Thyroid maintenance promotes weight loss by reviving a sluggish metabolism.

TSH Precursor also helps reduce fatigue and is recommended for cardiovascular, digestive, psychological, muscular and joint disorders.

Our TSH Precursor formula is scientifically formulated to optimise the thyroid’s functions and cellular processes.

Our thyroid hormone precursor facilitates the production of key hormones for improving wellbeing and physical, psychological and emotional balance.

Health claims

Selenium contributes to the normal thyroid function.

Composition

INGREDIENTS:
2 capsules contain: 300 mg of lipid extract of guggul resin (Commiphora mukul Engl.) standardised to contain 2.5% ketosteroid (i.e. 7.5 mg), 200 mg L-tyrosine, 100 mg of dry extract of ashwagandha root (Withania somnifera (L.) Dunal) standardised to contain 5 % withanolids (i.e. 5 mg), 100 mg dry extract of coleus (Coleus forskohlii (Poir.) Briq.) standardised to contain 10% forskolin (i.e. 10 mg), 9.5 mg of quercetin (of dry extract of Japanese sophora flower (Sophora japonica L.) (10 mg)), zinc gluconate (1.23 mg zinc (12% NRVs*)), selenium enriched yeast (8.4 µg selenium (15% NRVs*)).
*NRVs: Nutrient Reference Values.

Other ingredients:

Maltodextrin, vegetable-based capsule: hydroxypropyl methylcellulose.

ALLERGENS:
This product does not contain allergens (in accordance with Regulation (EU) No 1169/2011) nor genetically modified organisms.

FABRICATION AND GUARANTEE:
This dietary supplement is manufactured by a GMP-compliant laboratory (GMPs are the Good Manufacturing Practice guidelines for the European pharmaceutical industry). Their active principle content is guaranteed through regular tests, which can be viewed online.

Use

DIRECTIONS:
2 capsules per day with half a glass of water at mealtimes.

WARNINGS:
Do not use in people undergoing antidiabetic treatment or who suffer from heart problems. Do not use in case of pregnant or lactating women. Do not use in conjunction with heart medication. Consult your doctor or pharmacist in case of simultaneous use of anticoagulants. Do not exceed the recommended daily dose.

ADVICES:
Does not replace a varied and balanced diet and a healthy lifestyle. If you are undergoing medical treatment, seek your therapist's advice. For adult use only. Keep out of reach of children.

STORAGE INSTRUCTIONS:
Store in a cool dry place away from sunlight.

Detailed information

The thyroid gland plays a key role in cellular metabolism and the overall functioning of the body, particularly the ratio of lean muscle mass to body fat. The thyroid hormones produced by this essential gland depend largely on a trace element: iodine.

The body’s health is linked to thyroid activity. The thyroid gland secretes hormones called T3 (triiodothyronine) and T4 (thyroxine), and the amount of these two hormones it produces is of key importance; a good balance between these two hormone variations is essential. If the thyroid is working too slowly it leads to hypothyroidism, while an overactive thyroid will lead to hyperthyroidism. These two disorders cause symptoms that can be severe, such as iodine deficiency, enzyme problems, autoimmune disorders or diseases.

Cases of hypothyroidism are common, although few people are aware of them. They lead to a slowing of the metabolism. Fats accumulate and fatigue sets in. Hyperthyroidism is also a common health problem which often leads to cardiovascular, digestive, psychological, muscular or joint problems.

Our natural formula contains a careful balance of active principles that respect the body’s balance and the thyroid’s functions (selenium, zinc, L-tyrosine, plant extracts: Commiphora mukul (guggul), Sophora japonica,...). Our new formula also contains more L-tyrosine, an amino acid involved in the synthesis of the T3 and T4 hormones.

Containing plants which harmonise thyroid hormone secretion, this product is based on sound scientific research and helps maintain optimal balance in the body’s hormonal system.
